Lawful Interception, Intelligence Gathering and Law Enforcement Monitoring Solutions Conference

Tuesday, 29 October 2019 - Friday, 31 October 2019 | Conrad Centennial Singapore, Singapore

2019 AGENDA

Intelligence Gathering and Law Enforcement Monitoring Solutions Lawful Interception, Telecommunications Network Security, Mobile Location, Broadband Internet, VoIP and Social Network Monitoring Solutions Cyber Threat Detection & Cybersecurity Training Lawful Interception and Cybersecurity Training for Telecommunications Service Providers, Network Operators, Law Enforcement, Homeland Security, Intelligence and Cybersecurity Agencies

Agenda from ISS World Asia 2019 is shown below. Agenda is subject to change and will be updated August 2019

Advanced Off-Line Cyber Investigation Training Contact Lab by Law Enforcement Officers and Not Intelligence Agencies

Tuesday, 29 October 2019 - Friday, 31 October 2019 (Tutorial Day Only on Friday, 31 October)

Advanced Off-Line Cyber Investigation Training Contact Lab by Law Enforcement Officers and Not Intelligence Agencies

Instructor: Mark Bentley, Ph.D., Computer Forensics Lab Director, Lancaster University, UK

Tuesday, 29 October 2019

Session #1
8:00-10:00

Lawful Interception and Intelligence Gathering

Telecommunications Service Providers and Internet Communications Service Providers (CSPs) are required to cooperate with Law Enforcement and Intelligence Agencies in the execution of lawful interceptions and the gathering of critical intelligence. This session will provide an overview of the lawful interception and intelligence gathering standards and technologies that are being deployed by CSPs around the world.

Dr. Cemal Dalkilic, Lecturer, Istanbul Aydin University, Turkey

Session #2
10:30-12:30

Lawful Interception – Part 1 – Introduction

Telecommunications Service Providers and Internet Communications Service Providers (CSPs) are required to cooperate with Law Enforcement and Intelligence Agencies in the execution of lawful interceptions and the gathering of critical intelligence. This session will provide an overview of the lawful interception standards and technologies that are being deployed by CSPs around the world.
