

# ISS World<sup>®</sup> Americas

Intelligence Support Systems for Lawful Interception,  
Criminal Investigations and Intelligence Gathering

OCTOBER 11-13, 2011 • WASHINGTON, DC

---

## ISS World 2011 Americas -- Lead and Associate Lead Sponsors

ETI Group is an international group of innovative companies with worldwide leadership within development and production of advanced analysis monitoring solutions for all types of data and telecommunication networks. Besides research and development sites in the UK and Denmark, ETI Group has global support and service groups in the US, the UK, Denmark, Spain, the U.A.E., Singapore and France

Gamma Group presents its unique IT Intrusion portfolio - FINFISHER - at the ISS World Americas 2011. The FinFisher IT Intrusion products contain the most comprehensive infection and monitoring functionality found in any other solution. The FinFisher portfolio combined with superior training at Gamma's IT Intrusion Training Institute differentiates Gamma International as the leading company in the field of cyber surveillance. For more information contact: [info@gammagroup.com](mailto:info@gammagroup.com)

HackingTeam provides the premier integrated Cyber Intelligence solution: Remote Control System (RCS). Proven by years of worldwide adoption and designed to fulfill LEAs and Security Agencies higher expectations, RCS gives you total control over Desktops and Smartphones. Offering the widest selection of infection vectors and showing total invisibility to endpoint protection systems, RCS guarantees easy installation on target devices. An integrated, easy to use Console allows you to manage and control all your operations, all from the same place. Find out more at [www.hackingteam.it](http://www.hackingteam.it)

Kapow Software, headquartered in Palo Alto, CA, is the fastest-growing OSINT software firm in the world. Kapow Software is used by U.S. Intelligence Community analysts and developers to collect internet content in both a targeted and broad crawl manner. The Kapow Katalyst solution is unique in that it works on every website, in every language, every time.

Ntrepid Corporation provides national security and law enforcement customers with software, hardware, and managed services for cyber operations, analytics, language technologies, and tracking systems.

Qosmos develops Network Intelligence technology (an evolution of Deep Packet Inspection), which provides real-time visibility into data as it crosses networks. The company's software development kit and hardware probes are used by Government Agencies, Law Enforcement Agencies (LEAs) and System Integrators to enhance their lawful intercept and cyber security solutions.

Spectronic Systems is an independent and 100% privately owned company working exclusively with governments and government approved agencies. The Spectronic Systems activities include development and manufacturing of monitoring systems and monitoring centres handling telephony, internet/IP, fax and modem traffic for intelligence and law enforcement agencies. These solutions can act as data retention systems and/or as an intelligence platform for bulk monitoring of SMS, MMS, e-mails or other means of data communication

The logo for SS8, featuring the letters 'SS8' in a bold, orange, sans-serif font. A small 'TM' trademark symbol is positioned to the upper right of the '8'.

Headquartered in the heart of the Silicon Valley in California, SS8 is a leading worldwide provider of innovative regulatory compliant, electronic intercept and high capacity end-to-end cyber security solutions. SS8's solutions allow law enforcement and intelligence agencies to conduct lawful interception and monitoring of both circuit and packet-mode communications in accordance with local laws and standards. Since 1994, SS8 has delivered hundreds of Lawful Intercept deployments to the world's largest and most innovative carriers, national governments and law enforcement agencies.

The logo for Verint, featuring the word 'VERINT' in a bold, blue, sans-serif font. The letter 'V' is stylized with a diagonal slash through it.

Verint® Communications Intelligence and Investigative Solutions™ help organizations efficiently collect, correlate, analyze and investigate information from virtually any communication network and data-source to neutralize criminal and terrorist threats in time to make a real impact. Built on Verint expertise accumulated over the past 20 years deploying hundreds of projects in over a thousand sites and 70 countries, these solutions are reliable, scalable, and cost effective engineered to address communication technologies today and those that emerge tomorrow.

The logo for VUPEN security, featuring the word 'VUPEN' in a bold, blue, sans-serif font with a registered trademark symbol, and the word 'security' in a smaller, orange, lowercase, sans-serif font below it.

VUPEN Security is a leading IT security company providing exclusive vulnerability research for defensive and offensive computer security operations. VUPEN provides private and highly sophisticated exploits specifically designed for the Intelligence community, LEAs, and national security organizations to help them achieve their offensive missions using tailored and unique codes created in-house by our researchers. VUPEN also delivers highly technical vulnerability research reports to help governments and CERTs to protect critical infrastructures and assets against cyber attacks. VUPEN's customers include worldwide governments and intelligence agencies in NATO, ANZUS and ASEAN countries (for offensive security), and prominent corporations (for defensive security).
