

How to install the release

This release can be installed only over a previous 9.2.x release. It is still possible to install it from scratch (no previous RCS installation on the system).

9.3.0 specific instruction for upgrading form 9.2.x:

- Run the installer `rcs-setup-*.exe` on the backend server and answer 'yes' when asked to upgrade.
If you have multiple shards, install the update on all the shards first and then on the master node.
- Run the installer `rcs-setup-*.exe` on the frontend server and answer 'yes' when asked to upgrade
- If you are using the OCR module, please reinstall it on all the shards after the upgrade.
- There are important changes about Anonymizers chains, please contact HT to have assistance.
