

List of found surveillance devices

With images - updated in april 2021

This list is edited by the autonomous group « Ears and Eyes » in order to gather informations about surveillance devices placed by cops to surveil individuals and spaces. On our website you will find the latest versions of this document, as well as high resolution photos of most of the devices described below.

<https://earsandeyes.noblogs.org - desoreillesetdesyeux@riseup.net>

In buildings

Bologna (Italy)

july 2007

Two microphone receiver cases are found in the entry corridor of the building that hosts the Fuori Luogo space. Both devices are hidden **above a fake ceiling in the entry corridor**. They are directly connected to the phone line with telephone wires. They consist in a main body, with a connector with external remote control, a digital receiver showing the strength of the received signal, and antennas. The presence of these two receivers probably means there are two emitting microphones in the space.

https://cettesemaine.info/spip/article.php3_id_article=3117.html

Viterbo (Italy)

march 2008

A **microphone** is found in the home of a comrade of L'urto de Viterbo circle. The device is hidden **inside an air inlet** (ventilation system) of the house. It consists in 12 cylindrical batteries and a microphone.

https://web.archive.org/web/20170926153653/http://www.informa-azione.info/viterbo_ritrovato_lennesimo_marchingegno_per_intercettazioni_ambientali

Genova / Genoa (Italy)

october 2009

A **microphone** is found in the Doppiofondo documentation center **inside an electrical outlet**.

https://cettesemaine.info/spip/article.php3_id_article=2659.html

Lecco (Italy)

october 2010

A **microphone** is found in an anarchist documentation center **inside an electrical outlet**. It is a transmitter-receiver.

https://web.archive.org/web/20101011002129/http://www.informa-azione.info:80/lecco_%E2%80%93_ennesima_microspia
https://cettesemaine.info/spip/article.php3_id_article=3525.html

Milano / Milan (Italy)

november 2010

A **microphone** is found in the Panetteria Occupata **inside a closed and sealed electricity meter**. It is a microphone with a 300 Mhz shortwave transmitter.

https://cettesemaine.info/spip/article.php3_id_article=3711.html

Milano / Milan (Italy)

november 2010

Microphones and a micro-camera are found in multiple homes. The devices are found **in an amplifier, in the kitchen hood and in a cathode-ray television**. The devices have microphones and 300 Mhz transmitters with 200-300 meters range. In one case, the device can be activated by remote control (at a distance of hundreds of meters) and in another case it comes with a micro-camera linked to a UHF band transmitter of the same range.

Microphone inside the TV set

Microphone inside the cooker hood

Microphone inside the amp

Firenze / Florence (Italy)

january 2011

Microphones and cameras are found in the 400colpi space. A first device is placed **in an electrical case, strangely too hot**. It consists, along with a microphone, of a surveillance micro-camera. A second device is placed **in an industrial outlet**.

The first device

The second device

https://cettesemaine.info/spip/article.php3_id_article=3845.html

Bruxelles / Brussels (Belgium)

may 2011

A **camera** is found at two anarchists' houses. The device is placed **in the kitchen, behind a small air vent**. It consists in a camera, linked to a rather large battery made of 3 tubes of 4 batteries of 14.4 volts. The battery is behind the sink. Between the battery and the rest of the device is what seems to be a switch, that can be manipulated remotely. The camera is connected to a small black box that serves as an encoder. This encoder, type « Micro View Lock » (Ovations Systems), was in turn connected to what may be an antenna to transmit images on 1.4 Ghz. There is no SIM card. The camera is pointed towards the kitchen table. We don't know if it also contains a microphone. The camera is secured with magnetic elements. On almost all elements « CS » stickers are affixed. « CS » indeed matches the code store Logistics Department of the Federal Police.

<https://sysiphus-anqrynewsfromaroundtheworld.blogspot.com/2011/05/brussels-belgium-hidden-camera.html>

Bordighera (Italy)

may 2012

Four microphones and a camera are found in a house. A microphone is placed **behind the fridge**, another **in the bedroom**, another **in a beam next to the ceiling light**, another **in the house entry**. A graceful little camera **films the entry stairs**. All are connected through a transformer to the house electrical network.

https://web.archive.org/web/20171110231616/http://www.informazione.info/torino_trovate_microspie_nel_friigo_di_due_compagni_anarchici

https://cettesemaine.info/spip/article.php3_id_article=5072.html

Pisa (Italy)

may 2012

A **camera** is found hidden **in an air-conditioner inside a school**. The camera served to control the entrance of the house of some anarchist comrades under investigation, and had been placed there by plain clothes officers a few weeks before the comrades' house was searched.

<https://culmine.noblogs.org/2012/05/08/pisa-abpc-sabota-telecamera/>

<https://web.archive.org/web/20120716175517/actforfree.nostate.net/?p=9299>

Napoli / Naples (Italy)

october 2012

Two microphones are found in the anarchist space 76/A. The devices are placed **in the air vents** of the two rooms where gigs and initiatives are held. It consists in three 9-volt batteries set up in parallel and stuck to a transmitter microphone with tape.

The device was like that when it was found. The microphone is next to the two euros coin and the antenna is at the other end.

The microphone without the tape and with the tip detached

Detail of the emitting antenna with its cover

Detail of the emitting antenna without its cover

Everything dismantled. The batteries were without power.

Napoli / Naples (Italy)

february 2013

Four microphones of the GSM type are found in two homes. In the first home, a microphone is placed **next to the office where there is a computer** (for some time, the loudspeakers connected to this computer were disrupted by an interference similar to the interference of a phone receiving a call), another **in the outlet next to the kitchen table**, the last one **in the bedroom, in the outlet closest to the bed** (the outlet cover had been pierced to direct the microphone towards the headboard). In the second home, a microphone is placed **in the bedroom, in the outlet closest to the door**, which gives onto the kitchen, so that it covers several places. The microphones of the first home are Vodafone mobile phones, with a transformer and antennas with a printed circuit board. The microphone of the second home is an older model, with two transformers and an antenna with a screw.

Paris (France)

september 2015

A **surveillance device** is found in the « Plaisir d'enfance » Montessori school **just in front of the anarchist library La Discordia**, in a storage room on the first floor **overlooking a window in front of the library**. The device takes the form of a « cardboard folder ». The device is in a rectangular casing about 40x25x25 cm in hard plastic, loud (because of fans), and plugged into the power supply (without batteries). The casing has a hole of about 4 cm in diameter for the camera, with three cables coming out at the end, two of which are tipped antennae (probably sound sensors) and a third a small square sensor. Inside the box we find advanced technological equipment: a wireless router with two SIM cards (Bouygues), GPS, three cell inputs, one stereo input ; a processor ; a telephone device with an Orange SIM card (which means that the data was not stored but transmitted live) ; a camera with two zoom levels, remote controlled ; and other types of materials that we are not able to identify. The device was in place at least since the second week of July 2015.

London (United Kingdom)

from 2015 to April 2018

Several surveillance devices are installed from 2015 to April 2018 in the Ecuadorian embassy in London to surveil Julian Assange, founder of the news organisation WikiLeaks, which had taken refuge in the embassy since 2012. During this period of time, **the interior cameras are replaced with higher resolution cameras equipped with hidden microphones**; **microphones** are hidden **inside a fire extinguisher** and **above the storage cabinet in the bathroom used by Assange**; **special stickers** are attached **on the exterior windows of the embassy** to facilitate the use of a laser microphone (able to capture audio by detecting the sound vibrations of the windows) from a building nearby; and **a device capable of transmitting in real-time the information collected by the other devices** is installed. The microphone inside the fire extinguisher is equipped with an SD card and a battery which is changed every twelve hours, while the microphone in the bathroom is connected to the electrical system of the building. The devices are installed by the Spanish company Undercover Global, officially in charge of the security at the embassy. Their installation appeared to have been ordered by the Central Intelligence Agency (CIA).

Company identified: the surveillance devices were installed by the Spanish company **Undercover Global**.

Bologna (Italy)

june 2009

A **GPS tracker and microphones** are found in a car. The device is placed **in a plastic container (badly) stuck under the roof**. It contains two boxes : both contain a « base » mobile phone with a SIM card. From there wires go out, passing by a hole up to under the back seats. Here are two microphones passing by the seat belt canal : the first at the driver's height, the second at the height of the levers used to adjust the seat, next to the back seats. The antenna is behind the back seat. Finally, still coming from these two boxes, is a wire that goes through the car doors to reach the car fuse box.

Italy

may 2010

A **GPS tracker** is found under the truck of a member of the Nunatak magazine (italian magazine about mountains stories, cultures and struggles). The device is attached **with a magnet under the back of the vehicle**. It consists in Vodafone SIM cards connected to 4 « torch » batteries in a series.

https://cettesemaine.info/spip/article.php3_id_article=3216.html

France

march 2011

A **geolocation device** is found in the car of members of a support committee to the defendants in the Tarnac affair (in trial for the sabotage of a high-speed train catenary which took place in 2008). The device is placed **behind the car battery ventilation grids**. It consists in a small black case of 9 by 5 centimeters, connected with wires to the car electrical system. Inside, two printed circuit boards including a passive antenna, a geolocation device branded Navman and an Orange SIM card to transmit the data.

<https://www.lesinrocks.com/2011/05/04/actualite/affaire-de-tarnac-la-surveillance-policiere-prise-en-flag-1115752/>

Milano / Milan (Italy)

september 2012

A **listening and geolocation device** is found **on a scooter**. The different device components are located **in the spare wheel bracket, next to the tank and behind the horn grid**. The device is based on a device sold by Telit (an italian supplier of wireless technologies). The device model is Telit GM862-GPS. It is capable of listening with a microphone, geolocating with a GPS antenna, and transmitting collected informations on the telephone network with a GSM antenna. The device is placed in the spot where the tank is along with a transformer and an accumulator. Both antennas (GPS and GSM) are connected to the device and end up in the spare wheel bracket. The microphone, also connected to the device, ends up behind the horn grid. Wires connect the device to the scooter starting system. All these components are stuck to the scooter frame by strong magnets secured by tape. This scooter model doesn't have a battery (it dates back to the 1980s) and its engine generates alternating current, hence the presence of a transformer and an accumulator to guarantee the good functioning of this equipment even when the scooter is not going.

Additional files:

Napoli / Naples (Italy)

february 2013

Two GSM-type microphones with GPS tracker are found in a car. The devices are placed **inside the car ceiling, that hosts the small interior light**. It consists in Vodafone mobile phones, with a transformer and antennas with a printed circuit board. Microphones are pointed towards the front seats.

Valencia (Spain)

march 2015

A **geolocation device** is found on the car of an attendee to the Circumvention Tech Festival, a festival against Internet surveillance and censorship. The device is **magnetically mounted inside of the left wheel well of the car**. It consists in a battery, a GPS antenna, a GSM antenna and a Movistar SIM card. The various components are wrapped in black tape and magnetically mounted to the car mudguard and frame. Several clues leads to believe that the device may have been placed by cops from the « Cuerpo Nacional de Policía » (Spain national civilian police force).

<https://web.archive.org/web/20160408043848/https://people.torproject.org/~ioerror/skunkworks/forensics/valencia-tracking-device/>

Cagliari (Italy)

november 2017

Microphones and GPS trackers are found in a car. The microphones are placed **under the upholstery of the car roof, where the windscreen and the sunshields are** (so take a look there, you can't feel them from outside, so you have to slip your hand between the roof and the cardboard to which the upholstery is attached). In one case the power cables reached beneath the wheel, in the other they were attached to the car lights.

Bologna (Italy)

january 2018

Two microphones and a GPS tracker are found in a car. There is also a device equipped with an antenna, a SIM card from the TIM provider and a 16 GB memory card. The power cable is **connected to the fuse box** and to other wires located **under the dashboard**. Both microphones are located **under the upholstery of the car roof** and the wires arrive to the power supply **through the car door**. The magnetized GPS and the cards thingy with the antenna are hidden **behind the speedometer**. From what we could check, everything has been placed in the car more than a year ago and the microphones were recording even when the car engine was turned off, in a radius of several meters.

The microphones

A microphone

Cagliari (Italy)

september 2018

Two microphones and a GPS tracker are found inside a car. The microphones are placed **inside the upholstery of the car roof**, just above the driver's head. The GPS tracker, as usual, is **stuck to the car body with a magnet**. The bugs are connected to the car power supply at the level of the pedals, just below the lever that opens the front trunk.

Cagliari (Italy)

october 2018

Two microphones and a GPS tracker are found in the car of one of the persons under investigation for the 15 september repressive operation (see the sources). Microphones are located **above the driver's head, next to the junction of the car roof upholstery and the windscreen**. The GPS tracker is located **in the fuse box**. Everything is powered by a connection to the headlights cable (headlights that were dysfunctionning).

Cremona (Italy)

february 2019

A **microphone** is found in a car. It is located **in the upholstery of the vehicle roof**. The device wires are hidden in the isolation case. The device is connected to the car electrical system, so that the bug turned on when the car started. It is connected to a Vodafone SIM card protected by a PIN code.

Italy

august 2019

A microphone and two GPS trackers are found in a vehicle. One of the trackers is **attached with a magnet to the rear bumper, on the right side**. The other one, along with the microphone, is placed **in the air vents which are between the windscreen flap and the windscreen**. The first tracker is equipped with an accumulator made of five 3.6V lithium batteries connected in a series, and a SIM card from Omnitel (former name of Vodafone Italia, an italian operator). The other tracker is equipped with a SIM card from Movistar (spanish operator). Although the use of an Omnitel card (operator which doesn't exist anymore) and a spanish card is weird, it seems these trackers were assembled by the same people and probably installed these past months.

Berlin (Germany)

november 2020

A **GPS tracker and a microphone** are found in a car. The two devices were installed separately, **each in one of the front seat headrests**. The headrests were opened and glued back together after the bugs were installed. Both devices were equipped with two batteries each. The first device, which is apparently the control unit, is equipped with a GSM module to send GPS data and recorded audio files to the cops via the SIM card. On the control unit itself, there was a GPS/GSM antenna, the connection to the batteries and a microphone. Inside the device, a SIM card from "Deutsche Telekom" was found. The second device seems to be the actual audio monitoring device. It also has a battery connection, a smaller antenna and two microphones, which have been glued into the holes for the seat support, with anti-vibration padding. This device was equipped with an SD card, but there were no more audio files stored in it. Apparently, the SD card was used as a storage medium for the operating system data and for temporary storage of the recorded data. According to what is currently known, the GPS tracker was installed in august 2019 and the listening device intended for "internal surveillance of a vehicle" during or after september 2019. These devices were obviously installed by the federal criminal police (BKA) in order to retrieve information on the persons accused in the present "criminal association" proceedings.

1: control unit ; 2: batteries ; 3: GPS antenna ; 4: microphone ; 5: SIM card

2: two batteries of the listening device ; 4: microphones connected to the listening device ; 6: dismantled listening device ; 7: SD card

Besançon (France)

march 2021

A **GPS tracker** is found under a car. It is located **in the lower right body frame**. In september 2020, the owner of the vehicle had been accused as part of an investigation into the arson of several cell towers, before being cleared and released. The device was installed since may 2020, according to the cops.

Other

Torino / Turin (Italy)

february 2014

Two cameras are found in front of the Asilo Occupato. The devices are concealed **in a fake Enel (Italian electricity supplier) electric box attached on the first floor of a building**.

Company identified: the logo of the italian company Gruppo TRS, which was bought in 2012 by the italian company Atet, is visible on the pictures of the devices. This suggests that these devices were supplied by the italian company **Atet**. More info on this company can be found at <https://earsandeyes.noblogs.org/atet>.

The new case with Pinnocchio sitting on it

<https://cettesemaine.info/breves/spip.php?article556>

Genova / Genoa (Italy)

june 2014

Three microphones coming with cameras are found **in the alleys around a squat**. The devices are pointing on the different entries of the house.

Company identified: the pictures of the devices show that the cameras found were marketed by the italian company Elkron, which became a subsidiary of the italian company Urmet in 2012. This suggests that the cameras were supplied by the italian company **Elkron**. More info about this company can be found at <https://earsandeyes.noblogs.org/elkron>.

Sarthe (France)

september 2018

Three outdoor surveillance cameras are found outside, at an event organized in support of a struggle against a project of nuclear waste burying center. The cameras are all located **along a 250m pathway leading to the event place**. Two cameras of model BOLYGUARD MG983G are found **laying in the grass and in a bush, 80cm above ground** and are covered by a kind of camouflage hairnet. The third camera, of model RECONYX HYPERFIRE SM750, is found **on a tree trunk, 1m20 above ground** and has a khaki color. The contents of the SD memory cards reveal several things: the devices were placed on the same day very early in the morning (between 3h30 and 4h) ; the three devices are capable of night vision, two of them were configured to take pictures and one to record video and sound ; their placements allowed them to take pictures of the front and back license plates of cars driving on the pathway, and also of people following the pathway by foot ; one of the cameras was useless because of leaves in its field of vision.

Companies identified: according to the source that reported the discovery of the cameras, the cameras that were found were marketed by the companies **RECONYX** and **Boly**, based in the United States. More info about these companies can be found at <https://earsandeyes.noblogs.org/surveillance-industry-list-of-companies>.

Cuneo (Italy)

june 2019

A surveillance device capable of recording images and sound is found during a gathering in front of a jail. The device is located **behind a few stones, in a wall along a path**, wrapped up in a black garbage bag, next to the place where this kind of gatherings usually happen. It contains a battery, a SD card, a microphone, and a camera hidden behind a rock where a hole had been made. It seems that the device couldn't send the data, which was stored on the SD card. An analysis of the content of the SD card shows that the device was activated the 3rd of june and installed on the afternoon of the 7th, the day before the gathering.

Company identified: the pictures of the device show that a digital video recorder of model DK-PV500E, marketed by the italian company DSE (Digital Surveillance Equipment), was part of the device. This suggests that the device was supplied by the italian company **DSE**. More info on this company can be found at <https://earsandeyes.noblogs.org/dse>.

ZAD du carnet (France)

august 2020

Four cameras are found near the "ZAD du Carnet", a place of struggle against the creation of an industrial area, in Loire-Atlantique, in the west of France. The four cameras, hidden **near an access gate to the area**, are camouflaged in a **fake tree log and fake stones**. They filmed continuously and were connected, via buried cables, to large batteries and modems, also concealed, allowing images to be sent directly to a remote station. The mention "Allwan", visible on some of the images found, as well as on a label on a camera, strongly suggests that the equipment was supplied by the company Allwan Security. The cameras are found on august 31, and appear to have been installed right before a "weekend of resistance" organized there on august 29 and 30.

Company identified: the mention "Allwan", visible on images found on the devices, as well as on a label on a camera, suggests that the devices were supplied by the french company **Allwan Security**. More info on this company can be found at <https://earsandeyes.noblogs.org/allwan-security>.
