Ciao ciao,

Avete mai sentito parlare del kailax unlocker ? Il cliente svizzero ne ha uno che ha acquistato da un distributore tedesco chiamato qualcosa tipo "2beeuropa". L'aggiaggio permette di accedere a sistemi windows accesi ma con l'utente non loggato sfruttando una vulnerabilità del bus USB analoga a quella che abbiamo implementato sul TNI per il firewire. Il prodotto permette anche di eseguire applicazioni salvate su una chiavetta usb fornita con il prodotto senza dover sbloccare la pw dell'utente.

L'abbiamo usato per infettare un loro target con un silent installer ed ha funzionato, l'unlock ha richiesto meno di 1 minuto

Proviamo a ordinarne una per vedere se fa veramente quello che dichiara.

Facendo una ricerca veloce su internet e guardando il sito sembra quasi un fake, pero' non si sa mai...

io uso KON-BOOT che permette di loggarsi senza conoscere la password utente..
costa tipo 20 dollari la licenza e supporta sistemi 32/64bit fino a win 8.1

antonio

Good Morning,

We would need to order n° 1 Kailax Unlocker.

Could you tell me what is the cost and how to place an order?

Thanks a lot.

Kind regards,

Walter ci ha segnalato un dispositivo USB che permetterebbe di fare miracoli su di un PC lockato.

Siamo abbastanza scettici riguardo all'effettivo funzionamento, cio' non di meno abbiamo proceduto con l'ordinarla per poter effettivamente studiarne il comportamento.

Purtroppo il rivenditore non tratta con privati ma solo con LEA, per cui dovremmo chiedere a qualcuno dei nostri clienti di farcela avere.

Qual e' l'iter consigliato in questo caso?

Il sito del produttore e' <http://kailax.pl/index> ed il prezzo si aggira sui 600 euro.

Dear Rami,

I am Giancarlo Russo, COO at HackingTeam.

I would like to inform you that our interest in your product is for a LEA client of ours. As you might be aware of, HackingTeam develops and produces a solution exclusively dedicated to Intelligence/LEA and in this case the request to evaluate your product is coming from one of our clients.

I am sure you can understand that at this stage we are not in the position to disclose its name, however we are willing to enter into a confidentiality agreement signing a declaration to confirm you that the product is going to be used exclusively for a technical evaluation and will not be used on third parties devices if not our own and

our client testing devices.

I hope this might help in assisting our client request, I remain available for further clarification,

Best regards,

Giancarlo Russo

Giancarlo Hi!

As was stated by Rami our products are available to official governmental organizations only.

In each of the countries we are present at, in over 70 countries worldwide, we have a local distributor. Both the local distributor and us are bound by agreements not to show, sell or present the product to anyone who is not an official governmental organization.

I am sure you can understand that we cannot and will not sell show or present a unit to you.

If your clients are indeed official governmental organization interested in our product they are welcome to connect our local distributor in their country, if they do not know who the distributor is, they are more than welcome to contact us and we will make the connection.

Sorry we cannot help

Best,

Kailax Sales

Thank you Max for your promptly reply.

What if our clients will prepare a letter to you asking for our intermediation in the evaluation process?

As you know LEA has complex procurement process and it may takes time: based on other exisisting agreement we have, it will be easy for us to intermediate this activity. Moreover, it might become a partnership opportunity between our company.

Thanks

Giancarlo Hi!

As was stated by Rami our products are available to official governmental organizations only.

In each of the countries we are present at, in over 70 countries worldwide, we have a local distributor. Both the local distributor and us are bound by agreements not to show, sell or present the product to anyone who is not an official governmental organization.

I am sure you can understand that we cannot and will not sell show or present a unit to you.

If your clients are indeed official governmental organization interested in our product they are welcome to connect our local distributor in their country, if they do not know who the distributor is, they are more than welcome to contact us and we will make the connection.

Sorry we cannot help

Best,

Kailax Sales

Dear Rami,

I am Giancarlo Russo, COO at HackingTeam.

I would like to inform you that our interest in your product is for a LEA client of ours. As you might be aware of, HackingTeam develops and produces a solution exclusively dedicated to Intelligence/LEA and in this case the request to evaluate your product is coming from one of our clients.

I am sure you can understand that at this stage we are not in the position to disclose its name, however we are willing to enter into a confidentiality agreement signing a declaration to confirm you that the product is going to be used exclusively for a technical evaluation and will not be used on third parties devices if not our own and our client testing devices.

I hope this might help in assisting our client request, I remain available for further clarification,

Best regards,

Giancarlo Russo

Giancarlo Hi!

I may have been misunderstood.

No letter or any other form of communication will allow us to work with you directly.

We are not looking for partnership.

The only way the LEA you are talking about will get a unit is if they buy direct from our official distributor.

Even if the buy the unit from our distributor they will not be allowed to pass it on to anybody else for whatever reason without our consent.

Best,

Kailax Sales

Ci ho parlato e non hanno neanche intenzione di dirci chi è il loro reseller in Italia anche a fronte di una dichiarazione da parte dell'end user.

Non vedo alternative che chiedere a un cliente (ROS o Svizzera) se sono disposti loro a chiederne uno per noi. Potremmo provare la carta Salvo, ma non so se forniscano lui in qualità di Ausiliario...

Che ne pensate?

Siamo abbastanza scettici riguardo all'effettivo funzionamento, cio' non di meno abbiamo proceduto con l'ordinarla per poter effettivamente studiarne il comportamento.

Purtroppo il rivenditore non tratta con privati ma solo con LEA, per cui dovremmo chiedere a qualcuno dei nostri clienti di farcela avere.

Qual e' l'iter consigliato in questo caso?

Il sito del produttore e' <http://kailax.pl/index> ed il prezzo si aggira sui 600 euro.

Fabio suggeriva di chiedere ai ROS

From: Giancarlo Russo [mailto:g.russo@hackingteam.com]

Sent: lunedì 26 gennaio 2015 15:37

To: Marco Valleri; David Vincenzetti; Daniele Milan; Fabio Busatto; m.bettini

Subject: Re: Kailax

Ci ho parlato e non hanno neanche intenzione di dirci chi è il loro reseller in Italia anche a fronte di una dichiarazione da parte dell'end user.

Non vedo alternative che chiedere a un cliente (ROS o Svizzera) se sono disposti loro a chiederne uno per noi. Potremmo provare la carta Salvo, ma non so se forniscano lui in qualità di Ausiliario...

Che ne pensate?

On 1/26/2015 10:35 AM, Marco Valleri wrote:

Walter ci ha segnalato un dispositivo USB che permetterebbe di fare miracoli su di un PC lockato.

Siamo abbastanza scettici riguardo all'effettivo funzionamento, cio' non di meno abbiamo proceduto con l'ordinarla per poter effettivamente studiarne il comportamento.

Purtroppo il rivenditore non tratta con privati ma solo con LEA, per cui dovremmo chiedere a qualcuno dei nostri clienti di farcela avere.

Qual e' l'iter consigliato in questo caso?

Il sito del produttore e' <http://kailax.pl/index> ed il prezzo si aggira sui 600 euro.

Si` l'alternativa a Francesco potrebbe essere Raffaele dei ROS, secondo me ha senso puntare prima su clienti italiani superfidati e poi eventualmente tentare la carta di chi il prodotto ce l'ha gia` in mano. Ciao Fabio On 26/01/2015 15:46, Marco Valleri wrote: > Fabio suggeriva di chiedere ai ROS > > > > From: Giancarlo Russo [<mailto:g.russo@hackingteam.com>] > Sent: lunedì 26 gennaio 2015 15:37 > To: Marco Valleri; David Vincenzetti; Daniele Milan; Fabio Busatto; > m.bettini > Subject: Re: Kailax > > > > Ci ho parlato e non hanno neanche intenzione di dirci

sicuramente se lo contatta un cliente direttamente credo sia più facile poi veicolare il flusso di acquisto. Via mail mi ha detto che non è possibile ma non escludo che si tratti di una procedura loro e che a fronte di richieste effettive si possa ottenere l'oggetto... Caro Ivan,

ti informo che stiamo provveduto a fissare appuntamento a Zurigo per il giorno 10 Febbraio 2015, però il cliente dovrà confermarmi il tutto e sono disponibili solo la mattina, quindi è possibile che si parte Lunedì 09 Febbraio 2015 la sera, TI CONFERMERO' il tutto a breve.

Ti inoltro in allegato alcuni dettagli del prodotto e qui di seguito quello che il buon Walter ha mandato ad Ornella (non so se leggi anche tu da quella mail list).

Avete mai sentito parlare del kailax unlocker ? Il cliente svizzero ne ha uno che ha acquistato da un distributore tedesco chiamato qualcosa tipo "2beeuropa". L'aggiaggio permette di accedere a sistemi windows accesi ma con l'utente non loggato sfruttando una vulnerabilità del bus USB analoga a quella che abbiamo implementato sul TNI per il firewire. Il prodotto permette anche di eseguire applicazioni salvate su una chiavetta usb fornita con il prodotto senza dover sbloccare la pw dell'utente.

L'abbiamo usato per infettare un loro target con un silent installer ed ha funzionato, l'unlock ha richiesto meno di 1 minuto

Non ho altre informazioni in merito, ma se lo credi opportuno, ti consiglio di fare 2 chiacchiere con Walter, che è anche simpatico J

Ti ringrazio della disponibilità a nome del team.

io uso KON-BOOT che permette di loggarsi senza conoscere la password utente..
costa tipo 20 dollari la licenza e supporta sistemi 32/64bit fino a win 8.1

antonio

Giancarlo Hi!

I see you are very persistent, we take it as a complement to our product.

We have had a connection from Zurich police telling us that you wish to integrate our product in one of yours.

I just realized that you might not know much about our product and therefore even following our previous explanation still feel there is something to pursue.

The unlocker is a self-contained sealed and secure hand held unit that does one thing and one thing only, bypasses windows passwords and gives system rights on the **locked live PC**

If the unit senses any attempt physical or digital to undermine\hack\ its integrity it will brick itself and render it useless, we do not unbrick units, this is our way to protect our IP.

Now there are 2 ways you can integrate our unit in your system:

1. If your system is a collection of standalone tools and you want to add our unit as part of your offering, then you will have to contact our local distributor in the specific country you are dealing with and if you can prove to him end user he can supply the units to the end user. You will also have to work out with him your commission, and it is his prerogative if he wants to enter such deal, in past it was tried but shot price upwards that was not viable. In any case as I explain before you will not have any way to test or touch or any say in unit warranty.

2. If you are looking to add our ability as OEM on your system, this means we have to share our IP with you, that is possible but price for unlimited use is US\$ 4M, but you will also have to convince and assure us that no one else but you will have access to our IP.

I am sorry if we sound unfriendly, or uncooperative, but you as someone in this business will appreciate and understand our need to protect our investment and IP

Best,

Nir Levy (Max)

thank you, May I ask you the relevant contact for italian market to pass to my clients?

On 1/26/2015 2:38 PM, Max wrote:

Giancarlo Hi!

I may have been misunderstood.

No letter or any other form of communication will allow us to work with you directly.

We are not looking for partnership.

The only way the LEA you are talking about will get a unit is if they buy direct from our official distributor.

Even if the buy the unit from our distributor they will not be allowed to pass it on to anybody else for whatever reason without our consent.

Best,

Kailax Sales

Subject: Re: FW: I: Request of information

Thank you Max for your promptly reply.

What if our clients will prepare a letter to you asking for our intermediation in the evaluation process?

As you know LEA has complex procurement process and it may takes time: based on other exisisting agreement we have, it will be easy for us to intermediate this activity. Moreover, it might become a partnership opportunity between our company.

Thanks

On 1/26/2015 2:12 PM, Max wrote:

Giancarlo Hi!

As was stated by Rami our products are available to official governmental organizations only.

In each of the countries we are present at, in over 70 countries worldwide, we have a local distributor. Both the local distributor and us are bound by agreements not to show, sell or present the product to anyone who is not an official governmental organization.

I am sure you can understand that we cannot and will not sell show or present a unit to you.

If your clients are indeed official governmental organization interested in our product they are welcome to connect our local distributor in their country, if they do not know who the distributor is, they are more than welcome to contact us and we will make the connection.

Sorry we cannot help

Best,

Kailax Sales

Dear Rami,

I am Giancarlo Russo, COO at HackingTeam.

I would like to inform you that our interest in your product is for a LEA client of ours. As you might be aware of, HackingTeam develops and produces a solution exclusively dedicated to Intelligence/LEA and in this case the request to evaluate your product is coming from one of our clients.

I am sure you can understand that at this stage we are not in the position to disclose its name, however we are willing to enter into a confidentiality agreement signing a declaration to confirm you that the product is going to be used exclusively for a technical evaluation and will not be used on third parties devices if not our own and our client testing devices.

I hope this might help in assisting our client request, I remain available for further clarification,

Best regards,

Giancarlo Russo

Dear Max,

sorry for my late reply and thank you for you message, at least you were able to verify that our interest is genuine and it is coming from our clients. As i mentioned, we are willing to evaluate a partnership with you even if I personally consider option n.1 unfeasible since we generally act as main contractor and for our clients might be difficult to enter into separate agreement.

The 2 options is interesting even if at the moment is not matching our investment opportunities. I will discuss internally and be back to you as soon as possible.

In the meanwhile, I will pass your contact to additional 2 clients that showed an interest in your tool,

Giancarlo

'Giancarlo Russo' <g.russo@hackingteam.com>

Giancarlo Hi!

I see you are very persistent, we take it as a complement to our product.

We have had a connection from Zurich police telling us that you wish to integrate our product in one of yours.

I just realized that you might not know much about our product and therefore even following our previous explanation still feel there is something to pursue.

The unlocker is a self-contained sealed and secure hand held unit that does one thing and one thing only, bypasses windows passwords and gives system rights on the **locked live PC**

If the unit senses any attempt physical or digital to undermine\hack\ its integrity it will brick itself and render it useless, we do not unbrick units, this is our way to protect our IP.

Now there are 2 ways you can integrate our unit in your system:

1. If your system is a collection of standalone tools and you want to add our unit as part of your offering, then you will have to contact our local distributor in the specific country you are dealing with and if you can prove to him end user he can supply the units to the end user. You will also have to work out with him your commission, and it is his prerogative if he wants to enter such deal, in past it was tried but shot price upwards that was not viable. In any case as I explain before you will not have any way to test or touch or any say in unit warranty.
2. If you are looking to add our ability as OEM on your system, this means we have to share our IP with you, that is possible but price for unlimited use is US\$ 4M, but you will also have to convince and assure us that no one else but you will have access to our IP.

I am sorry if we sound unfriendly, or uncooperative, but you as someone in this business will appreciate and understand our need to protect our investment and IP

Best,

Giancarlo Hi!

I may have been misunderstood.

No letter or any other form of communication will allow us to work with you directly.

We are not looking for partnership.

The only way the LEA you are talking about will get a unit is if they buy direct from our official distributor.

Even if the buy the unit from our distributor they will not be allowed to pass it on to anybody else for whatever reason without our consent.

Best,

Kailax Sales

Thank you Max for your promptly reply.

What if our clients will prepare a letter to you asking for our intermediation in the evaluation process?

As you know LEA has complex procurement process and it may takes time: based on other exisisting agreement we have, it will be easy for us to intermediate this activity. Moreover, it might become a partnership opportunity between our company.

Thanks

Giancarlo Hi!

As was stated by Rami our products are available to official governmental organizations only.

In each of the countries we are present at, in over 70 countries worldwide, we have a local distributor. Both the local distributor and us are bound by agreements not to show, sell or present the product to anyone who is not an official governmental organization.

I am sure you can understand that we cannot and will not sell show or present a unit to you.

If your clients are indeed official governmental organization interested in our product they are welcome to connect our local distributor in their country, if they do not know who the distributor is, they are more than welcome to contact us and we will make the connection.

Sorry we cannot help

Dear Rami,

I am Giancarlo Russo, COO at HackingTeam.

I would like to inform you that our interest in your product is for a LEA client of ours. As you might be aware of, HackingTeam develops and produces a solution exclusively dedicated to Intelligence/LEA and in this case the request to evaluate your product is coming from one of our clients.

I am sure you can understand that at this stage we are not in the position to disclose its name, however we are willing to enter into a confidentiality agreement signing a declaration to confirm you that the product is going to be used exclusively for a technical evaluation and will not be used on third parties devices if not our own and our client testing devices.

I hope this might help in assisting our client request, I remain available for further clarification,

Best regards,

Giancarlo Russo

Giancarlo Hi!

There was never a doubt from our side about your intentions.

From our experience since in effect we are both manufacturer\suppliers of technology we are in essence competitors, very difficult to find a way to maintain a relationship.

As you must know we are in same niche market that is usually based on trust and therefor our reputation is first and foremost. Our first responsibilities lay with our existing partner and distribution network, which we must guard.

Option 1 is feasible only if you are prepared to supply to customers as a sub distributor black box technology which you do not own, have no deal understanding of the IP or maintain.

Knowing our suppliers they are happy to and some of them do use sub suppliers to get to new customers.

Option 2 is really more of a partnership, and that why the initial cost are high.

We are always open to try new things but only if they are feasible and have a real future.

Best,

Nir Levy (Max)

Re-price: we tackle that as a new offer since that one expired long ago... right?

----- Forwarded Message ----- Subject: RE: Italian Lasagna - continue Date: Wed, 11 Feb 2015 00:27:26 +0200 From: Dotan Peltz <Dotan.Peltz@nice.com> To: Massimiliano Luppi <m.luppi@hackingteam.com> CC: Yuval Nativ <Yuval.Nativ@nice.com>, 'HT' <rsales@hackingteam.it>, Adam Weinberg <Adam.Weinberg@nice.com>, 'Daniele Milan' <d.milan@hackingteam.com>

Hello Massimiliano,

The document includes items that can only be filled once we finalize the deal (PO number, price and so on).

We have made it clear to the customer that this kind of thing needs to be signed, and will take care of it as soon as all the information is available.

By the way – re price: how do we tackle that? The customer can sign the price he knows, which is not the price relevant for HT.

Thanks,

Dotan Peltz

Subject: R: Italian Lasagna - continue

Hello Dotan,

we can do the call, of course.

However keep in mind that we will be able only to repeat what written in the document.

Regarding the pending issues, we've been as open as possible , so we are sure neither the customer nor NICE will push for answers we cannot give due to Intellectual property.

Last but not least, the Wassenaar arrangement in place from starting from January 2015 require us to have the End User Statement signed by the end user in order to be compliant with the export regulations.

The document is attached, please let us have it signed as soon as possible in order to speed up the process.

Hello Massimiliano,

Document shared with the customer.

Regarding next steps:

What we proposed in order to be efficient –

1. On 19/FEB we will have a meeting with the customer to have a "reran" of all the technical information and details we can share from our past experience with your products (involving the previous stages of Lasagna and other projects).
2. In turn, we will give you a call while being with the customer for a short conference. The goals of this are (a) that you show the customer that you still love them and (b) that we try to address generic pending issues that we could not address during phase [1] above.
Needless to say that you should not address issues which are commercially sensitive or anything similar over the phone. We will make sure to have this very clear.
3. During the conference we will set the date for the customer's meeting in Milan. The goal of this is to have a demonstration of the entire suite (TNI, but also the full-scale solution including back-end and so on) and to discuss the details.

You heard it several times in the past both from Aviv and myself, but knowing this customer – they would not waste time (neither ours nor theirs) had they not have an honest intent to finalize the deal. I believe we are at the very last mile here.

Thanks,

Dotan Peltz

Hello Dotan,

Attached the file with our answers; the password is the same Adam used.

As you'll see there are some information we cannot share.

We believe that it's better to set a meeting with the customer here in Milan, rather than a call during which we won't be able to share more than what reported here.

Hello Massimiliano,

We are mission oriented and strive at making sure this customer ends up with your technology.

I'm certain that this aspiration is shared by you.

Hence, I'm not sure what you mean by declaring an opportunity as dead. The customer is very much alive and so is the operational need.

I will be setting a conference call for 19/FEB, 12:00 (CET). This will be with the customer, HT and NICE.

The goal of the conference call is to mutually review your responses in an interactive manner to make sure everything is clear.

Also during the conference the we should agree on a date for a visit to your premises.

Please advise when can you return the list of questions with respective responses.

We strongly believe in this opportunity and in the team's ability to make it happen. As you very well know, in this business there are no free meals and processes take time.

While the customer is not always right, he is always the customer...

Thanks,

Dotan Peltz

Subject: R: Italian Lasagna - continue

Good morning Adam,

we reviewed the document you sent us.

Let's first make clear that most of the questions were either already addressed during the many meetings we had in the last 2 years or require HackingTeam to disclose part of its intellectual property, something that of course we cannot do.

Also, allow us to say that we grew the impression that the intent of this ever-increasing set of questions goes well beyond any product evaluation.

This said, as you suggest we'll reply wherever possible but leave empty the questions that we cannot address. Of course, in no case we can disclose such information hence please make it clear to the client to avoid expecting that in the future.

We are willing to have a meeting with them for a final round of discussion.

After that, we expect to move quickly towards the contract or we will consider the project dead.

Looking forward to receiving your feedback

Kind regards

Massimiliano Luppi

Oggetto: Italian Lasagna - continue

Dear Daniele and Max –

Despite some small delay compared to what we expected last year, we have very positive indications from the customer and they are willing to move forward and close the deal very fast.

As we already updated you, the intention is to close it based on the current RCS solution and avoid as much as possible (hope that completely) any requirements for special developments.

However, as currently the operational need is different on their side, after reviewing the documentation, they came up with the attached list of questions, which require your help in providing answers.

The process as they described is as following:

- After reviewing the answers they would like to have a conference call with you and us (HT and NICE) for further clarifications.
- After this clarifications, they probably will want to have another F2F meeting in Milan – for final closing of all issues.

We do understand that some of the questions may seem to be too detailed, so please feel free to avoid answering in details whenever this is the case.

May we also suggest that we will set an internal (HT and NICE) conference in a day or two for possible clarifications.

Lastly – we want to update you about changes in NICE team: Dotan is back as the sales director for this customer (replacing Aviv) and Yuval is our new marketing manager for active cyber solutions.

BTW – Max, the attachment is password protected, please let me know if you need me to send it....

Regards,

Adam.

Ciao Andrea,
ti rimando la mail di Giancarlo con le informazioni relative al tool.
A prestoMarco

Il giorno 06/feb/2015, alle ore 15:34, Giancarlo Russo <g.russo@hackingteam.com>
ha scritto:
Ciao Andrea,

spero tu stia bene. Come anticipato da Marco, ti riporto i contatti del produttore del
tool per le infezioni su pc lockati. Come puoi vedere non negoziano con noi anche a
fronte di una manifestazione di interesse da parte vostra.

Mr. Levi: max@kailax.com

A presto,

Giancarlo

Giancarlo Hi!

As was stated by Rami our products are available to official governmental
organizations only.

In each of the countries we are present at, in over 70 countries worldwide, we have
a local distributor. Both the local distributor and us are bound by agreements not to
show, sell or present the product to anyone who is not an official governmental
organization.

I am sure you can understand that we cannot and will not sell show or present a unit
to you.

If your clients are indeed official governmental organization interested in our product
they are welcome to connect our local distributor in their country, if they do not
know who the distributor is, they are more than welcome to contact us and we will
make the connection.

Sorry we cannot help

Best,

Kailax Sales

Hi Giancarlo and Philippe,
Attached a SOW proposal from Kailax for the design/development of a unique version of the unlocker/ucap for HackingTeam.
This will be a new developed product and exclusively will be delivered/developed for Hackingteam.
Please read it through and I look forward on hearing your commentsand questions.
We can discuss this at ISS but also feel free to reach out to me this coming week (I will be on EST as I am washingthon next week)

Hi Peter,

sorry for the delay of my reply. I guess you are in Prague, unfortunately I am not attending however you will meet Philippe and other guys of the team

Regarding the SOW proposal, It is of course interesting however it is a considerable investment we should evaluate according to the actual attractiveness for our clients. We are going to analyze and elaborate more in the next weeks regarding this project.

On a side note, as I mentioned weeks ago we have already one client interested in getting 1 unlocker. How can we proceed on this topic?

thanks

Giancarlo

Hi Peter,

sorry for the delay of my reply. I guess you are in Prague, unfortunately I am not attending however you will meet Philippe and other guys of the team

Regarding the SOW proposal, It is of course interesting however it is a considerable investment we should evaluate according to the actual attractiveness for our clients. We are going to analyze and elaborate more in the next weeks regarding this project.

On a side note, as I mentioned weeks ago we have already one client interested in getting 1 unlocker. How can we proceed on this topic?

thanks

Giancarlo

Hi Giancarlo and Philippe,

Attached a SOW proposal from Kailax for the design/development of a unique version of the unlocker/ucap for HackingTeam.

This will be a new developed product and exclusively will be delivered/developed for Hackingteam.

Please read it through and I look forward on hearing your comments and questions.

We can discuss this at ISS but also feel free to reach out to me this coming week (I will be on EST as I am Washington next week)

Hi Giancarlo,
Thanks for the customer info. No issues there, so please let me know if you need a quote from us and if this is for the unlocker and ucap. And off course the quantity. We will meet in the netherlands soon :)
Met vriendelijke groet, Best regards,

Very good news, I hope to visit you in the Netherlands very soon!

Regarding the unlocker, It is for an Italian law enforcement army (I also provide the name to Max months ago).

Giancarlo

Hi Giancarlo,

Thank you for the update.

I will speak to the guys here as I have some goods news about the Netherlands for your products.

Regarding the unlocker. If you have a customer then we can quote you and sell it to

you. Would you be able to tell us the country where it will be shipped to?

Met vriendelijke groet, Best regards,
