Lead Sponsor

Nokia Siemens Networks is one of the world's largest network communications companies with 60,000 employees and a leading position in all key markets across the world. The Nokia Siemens Networks business unit Intelligence Solutions (IS) has a unique best-in-class experience with lawful interception and government agency requirements because of numerous projects within its Monitoring Center product line. Deep understanding of security issues - inside military organizations, MOI, and other security services - as well as a broad security awareness contribute to IS's excellent relationships, which are based on trust, reliability and stability - values that finally culminate in its customers thoroughgoing satisfaction. Making the world safer with trend-setting intelligence www.nokiasiemensnetworks.com

Spectronic is one the world's leading suppliers of highly advanced mission-critical surveillance and communications interception equipment for government agencies, providing solutions for intercepting and decoding various types of communication methods and protocols. Our solutions are of modular design, allowing us the flexibility to deliver complete turn-key monitoring centers, or decoding components that can be integrated into existing systems’. www.spectronic.com

RCS background is based upon many years of in-field experience in design and operation management of a number of actual LI systems: from the capture plants for wireline and mobile telephony to the large scale Law Enforcement Monitoring facilities both for voice and Internet contents. A consolidated operational background in LI that allows us to detect and solve any issue concerning the design, development, deployment, and operation of a real-world interception architecture.

ClearTrail's products intercept and analyze data and voice communications across millions of simultaneous connections, to deliver early warnings and rapid intelligence that enables informed decision making on business-critical and mission-critical situations. Our comprehensive analytical LI platform supports a variety of proprietary surveillance systems that range from portable and tactical field surveillance units for monitoring of GSM & public Internet networks to monitoring of ILD, GPRS, GSM and NGN networks. This unified LI platform forms the central monitoring station which receives intelligence feed from securely connected field and carrier class interception systems. www.clear-trail.com

Comptel provides Comptel Dynamic OSS solutions, offering service-enabling mediation, charging and fulfillment capabilities to telecom service providers. Comptel's expertise in inventory, provisioning and
activation, mediation and charging empowers service providers to focus on delivering the innovative services. Comptel has provided solutions to around 260 customers in 85 countries worldwide. www.comptel.com

The ATIS systems group has a 60-year track record in recording technology and a 15-year track record in integrated lawful interception. With its solutions ATIS is a key technology partner for Law Enforcement Agencies (LEAs), members of the public safety community, network operators and network equipment vendors. www.atis-systems.com

ETI Connect is a global provider of Lawful Intercept systems, which enable reliable, efficient and lawful monitoring on all types of communication. ETI Connect is the commercial division of the ETI Group - an international group of companies with world-class capabilities in the development and production of advanced analysis and test systems for all types of data and telecommunication networks. www.eticonnect.net

Openet is a worldwide provider of event processing and transaction management solutions. Built upon our industry leading FusionWorks Platform, the Openet Lawful Network Surveillance Solution enables you to respond both accurately and efficiently to government legal requests. A global company, Openet’s implementations include long-running engagements with the world’s leading service providers such as British Telecom, TIM, Orange, O2, AT&T and Verizon Wireless. www.openet.com

SS8 Networks is the recognized independent leader in lawful intercept and a worldwide provider of regulatory compliant, electronic surveillance solutions. We have deployed proven lawful intercept solutions on all continents, in the networks of the largest telecommunications service providers and government agencies. SS8 Networks has grown a team with unequalled core competence our installations serving over 10,000 law enforcement agents. www.ss8.com

Ericsson is shaping the future of Mobile and Broadband Internet communications through its continuous technology leadership. Providing innovative solutions in more than 140 countries, Ericsson is helping to create the most powerful communication companies in the world. Ericsson offers state of the art Data Retention and Lawful Interception Solutions. www.ericsson.com

CopperEye is a leading provider of data retention and retrieval solutions designed to meet the requirements of organizations challenged with explosive growth in the volume of data they must manage. CopperEyes software helps companies cost-effectively capture, quickly store, and instantly access selective transactions from tens- or hundreds-of-terabytes whether the data is seconds or decades old. This is increasingly important as data volumes more than double every year and regulations require organizations to keep data longer. In addition, CopperEye's patented indexing technology approach delivers a quantum leap in performance in an open access format, supporting rapid data retrieval from enormous volumes of data at a fraction of the cost of traditional database and data warehouse approaches, while eliminating vendor and technology dependency. www.coppereye.com
Retentia, Inc. is a data retention software company with a client base that includes some of the largest Service Providers, Law Enforcement and Government Agencies in the world. Retentia’s Data Retention Suite (DRS) enables Telco’s and ISP’s to capture billions of xDRs daily, allowing LEAs to query in real-time, securely, efficiently, and cost-effectively. Retentia is a wholly owned subsidiary of Intelligentias, Inc. www.retentia.com

Amesys is the new French reference in critical systems for the Defence & Government markets. A workforce of more than 850 people to provide you with a unique range of services: engineering, integration of complex architectures, hardware and software product developments … Our expertise: Elint, Comint, Cryptography, Lawful interception, Satcom, Government solutions. www.amesys.fr
