Lead Sponsor

Nokia Siemens Networks is one of the world's largest network communications companies – with 60,000 employees and a leading position in all key markets across the world. The Nokia Siemens Networks business unit 'Intelligence Solutions' (IS) has a unique best-in-class experience with lawful interception and government agency requirements because of numerous projects within its Monitoring Center product line. Deep understanding of security issues — inside military organizations, MOI, and other security services — as well as a broad security awareness contribute to IS's excellent relationships, which are based on trust, reliability and stability — values that finally culminate in its customers' thoroughgoing satisfaction. Making the world safer... with trend-setting intelligence solutions www.nokiasiemensnetworks.com

Associate Lead Sponsors

Amesys is the new French reference in critical systems for the Defence & Government markets. A workforce of more than 850 people to provide you with a unique range of services: engineering, integration of complex architectures, hardware and software product developments... Our expertise: Elint, Comint, Cryptography, Lawful interception, Satcom, Government solutions. www.amesys.fr

The ATIS systems group has a 60-year track record in recording technology and a 15-year track record in integrated lawful interception. With its solutions ATIS is a key technology partner for Law Enforcement Agencies (LEAs), members of the public safety community, network operators and network equipment vendors. www.atis-systems.com

Gamma Group is a successful company specializing in the field of surveillance technologies for government end-users. We supply the whole range, from a single standalone product to a complete coherent system solution to meet your intelligence operational needs. We guarantee our customers high-quality innovative product solutions and expert training with our ultimate goals of continued success and customer satisfaction.

Intelligentias is a leading data retention and management company that provides data capture, archiving and tracing solutions for telecommunication companies, Internet service providers, enterprises and law enforcement agencies all over the world. Intelligentias'

Retentia Data Retention Suite (DRS) enables telcos and ISPs to assist law enforcement agencies in locating and prosecuting terrorists and criminals and to stay in compliance with federal legislation and directives, faster and for less money than competing solutions. Intelligentias is headquartered in Redwood City, California, with offices in Rome and London. For more information, please visit: www.intelligentias.com

Kommlabs was established in 1995 as Voxtron Deizgn Lab Pvt. Ltd. and has focused on developing carrier grade Interception solutions. Over the years has installed countrywide interception solutions in heterogeneous environments. We help Service Providers and Intelligence & Law Enforcement Agencies meet this challenge by providing end-to-end Lawful Interception and Mass Interception solutions for Circuit Switched and Packet Switched communication. We provide solutions for all types of networks including Wireline (PSTN), Wireless (GSM, CDMA, UMTS & EVDO), packet based VoIP and Internet. Our solutions supports all communication applications such as Voice, Fax, SMS, Data (Internet, email, Webmail, chat and VoIP) www.kommlabs.com

Spectronic is one the world's leading suppliers of highly advanced mission-critical surveillance and communications interception equipment for government agencies, providing solutions for intercepting and decoding various types of communication methods and protocols. Our solutions are of modular design, allowing us the flexibility to deliver complete turn-key monitoring centers, or decoding components that can be integrated into existing systems. www.spectronic.com

ThorpeGlen TMS provides Data Extraction and Analysis solutions to Law Enforcement and National Security using large data collectors and a central intelligence system. ThorpeGlen's predictive intelligence capability discovers new communication devices used by criminals and once new devices are identified, the TMS will track the position of that equipment.

Utimaco is the leading provider of data security solutions. Our Lawful Interception Management Solution (LIMS) is installed in more than 60 countries to enable telecommunication providers to fulfill LI requirements. Constant adaptation to new types of networks enables the very latest communication technologies to be introduced and monitored without delay. www.utimaco.com
