

When I open the exploit file,
The word 2007 open the warning pop-up
I already click
to this option

The continue then offcourse you
see the log that RCS agent executed

We execute: the sAEXjb.zip on

Win 8.1 pro 64 bit
Adobe Flash 17.0.0.169 (latest
version, install May 8th,2015)
MS Office Enterprise 2007
New Windows User for test
Java 8 update 40

If I click to this option
Then RCS agent
can't be executed

If you see the pop when open the word file then
I click to cancel since I guess that it is malware
Then you never get the rcs agent executed
