#### Fall 2006 Lead Sponsor:

VeriSign, Inc. (Nasdaq: VRSN), delivers critical infrastructure services that make the internet and telecommunications networks more intelligent, reliable and secure. Every day VeriSign helps thousands of businesses and millions of consumers connect, communicate, and transact with confidence. Additional news and information about the company is available at [www.verisign.com](http://www.verisign.com).

#### Fall 2006 Associate Sponsors

SS8 Networks' Xcipro™ Lawful Intercept Products allows both carriers and switch vendors to meet legal obligations of government and law enforcement personnel to monitor conversations and transactions on both traditional and IP-based networks. SS8 Networks' packaged approach shortens internal development time and reduces costs for switch vendors and minimizes network engineering and security concerns for carriers. [www.ss8.com](http://www.ss8.com).

Founded and headquartered in Bad Homburg, Germany, the ATIS systems group employs approximately 200 staff, of which the majority are engineers, in 6 countries across Europe, Asia and North America. With a 60-year track record in recording technology and a nearly 15-year track record in integrated lawful interception, ATIS has been a key technology partner for Law Enforcement Agencies (LEAs), members of the public safety community, network operators and switch manufacturers. For the purpose of supporting this status, the ATIS systems group continually reinvests at least 20% of its revenues in research and development initiatives per annum in order to achieve its objective of technology leadership. Siemens - with its 150 years of experience in the field of telecommunication is the sole company world-wide having LI solutions for both networks, target management, and Monitoring Centers. As a part of this unmatched experience, the Monitoring Center solutions have been especially developed to handle all interception tasks of Law Enforcement Agencies for fixed, mobile, and IP based networks including post-processing and intelligence. [www.siemens.com](http://www.siemens.com)

Verint is a leading global provider of analytic software-based solutions for communications interception, networked video and business intelligence. Verint solutions transform voice, video and data into actionable intelligence - timely, mission critical information for faster, better informed decision making and more effective action. [www.Verint.com](http://www.Verint.com)

Being the undisputed leader of the Italian Lawful Interception market since 1990, RCS is a multifunctional company with a huge and growing capital in terms of know-how, human resources and technology. RCS customers are divided into three main categories, with relevant differences in approach, technological background and organisation: Law Enforcement Agencies, Telecom Operators and Intelligence Services. [info@rcslab.it](mailto:info@rcslab.it)

Detica is a business and technology consulting firm specialising in Information Intelligence. We help our clients transform complex data into valuable intelligence, enabling better decision making and sustained performance improvement. Our engagements range from strategy formulation, through people and process change, to the delivery and support of technology solutions. [www.detica.com](http://www.detica.com)

Agilent provides a real time and historic source of rich intelligence data through passive monitoring techniques. Based on highly reliable, scalable and commercially proven technology, these solutions capture and record details and content of all mobile voice and data transactions across network technologies, to identify, locate and track suspects without alerting them. This wealth of intelligence is available for pattern trending and call analysis. [www.agilent.com](http://www.agilent.com)
